BHARAT MACHINE TOOLS BANGLE AND RING MAKING PLANT SPECIFICATION

Machine 1(Heavy Tube Forming Machine)	Technical Details
 Two photographs of the Heavy Tube Forming Machine. The left image shows a side view of the machine, which is light blue with a control panel on top. The right image shows a front view of the machine, highlighting the rollers and the handle mechanism. Both images show the machine on a white surface.	<p>Specifications</p> <ol style="list-style-type: none">1)Max sheet thickness:2 mm2)Max sheet width: 20mm3) Power:2 HP Single Phase/Three phase

4)Dims: 28x192x52
5)Weight: 150 kg

Usage:
Used for making both light and heavy bangles and rings.

Machine 2
(Heavy Strip Cutter Machine)

Technical Details

Specification

- 1)Minimum strip width:4mm
- 2)Max strip width: 60mm
- 3)Maximum strip thickness:1 mm
- 4)Dimensions:17x17x41

Usage

Used to cut with extreme accuracy gold, silver, and brass strips as thick as 1 mm.

Machine 3
(Single Head Rolling
Machine Italy Model
6"x3")

Technical Details

Specifications

- 1) Roller Width x Diameter: 152x75 - 6"x3"
- 2) Motorized Rolling machine
- 3) Wire grooves from 9 mm to 0.75 mm(24 gauge)
- 4) Max sheet width allowed: 48 cm
- 5) Power supply: 2 hp/1.5 kw 1/3 phase
- 6) Machine Dimensions in cm: 77x38x138
- 7) Machine net weight: 125 kg

Usage:

Used for thinning sheets and wires. Sheets can be made thin upto 36 gauge and wire upto 24 gauge. Further thinning of wire beyond 24 gauge requires wire drawing machine which is also manufactured by **Bharat Machine Tools**.
